

To install this component you need to have installed Adobe's Extension Manager. If you don't have just download it from this link : [http://www.adobe.com/exchange/em\\_download/](http://www.adobe.com/exchange/em_download/) After you've installed the Extension Manager, just double click on the \*.mxp file from the archive and open it with the Extension Manager. Restart your Flash Application if it was opened. Open the components panel and there, under the "rubenbristian.com" folder you will find this component.
